

Unconventional Oil and Gas Course

CPE Information

Program Description: This one-day course will provide an overview of the upstream portion of the oil and gas industry, with some midstream information, and will cover the following topics: 1) the Structure of the Industry; 2) Geology and Exploration; 3) Mineral Rights & Leasing; 4) Drilling and Completion; and 5) Development and Production Operations.

Learning Objectives: The course information should improve workplace comprehension of accountants working in or with the oil and gas industry including oil and gas accounting staff, internal auditors, external auditors, tax professionals and other finance staff. Specifically, the course will help attendees perform the following with regard to the upstream sector:

- Explain industry functions and their role in the overall business process
- Describe key operations driving revenues and costs
- Recognize terms used in accounting records, invoices, and other business documents
- Name the source activities underlying major accounting workflows
- Interact with coworkers or clients with greater competence and understanding

Instructional Delivery Method: Live presentation

Prerequisites: None

Advance Preparation: None

Program Level: Overview
